

*This is our 30th
year hosting
field trips for
local schools!!!*

Open Since 1986

BOOK A FIELD TRIP AT Old McDonald's Farm

Sackets Harbor, NY

✦ ***Experience a hands-on visit with over 1,000 animals.*** Students forget that they are learning as they visit all of our animals and explore our hands-on displays in the Discover Farming Center! Even teachers and parents will learn and have fun!

✦ ***Ride on the Moo Town Trolley Dairy Tour.*** North Harbor Dairy is owned by the Robbins family, and is the #1 milk producing dairy farm in Jefferson County. Technology in agriculture has advanced significantly over the past 50 years. Students and teachers are able to get a close look at our state of the art dairy facility—from our robotic calf feeding system to our newly-updated milking parlor.

Your field trip is customizable! Choose from these activities:

- ✦ Wizard of Oz Hayride
- ✦ Educational Dairy Tour
- ✦ Animal Park Time
 - Visit the animals
 - Explore the Discover Farming Center
 - Optional Scavenger Hunt
- ✦ We can also schedule each class a 30 minute lunch period!

*See the next page for more
information & Contact Info*

You won't regret a trip to the farm!

Possible funding options include BOCES Coser grants and your PTO!

STEM education plays a critical role in school curriculum. Our farm is capable of hitting every aspect of STEM in a way that students will never forget!

Science: Cows, plants, farm animals, soil, water... science is everywhere on a farm!

Technology: See how we use technology at the dairy and at Old McDonald's Farm to ensure that our animals are well fed and taken care of! Even cell phones and iPads are important on today's modern farm!

Engineering: Pulleys, belts, hinges, and wheels are just a few examples of engineering on a farm that your students can learn about!

Math: How many cows are in a "group?" How many pounds of milk do we feed to our calves every day? How many bushels of corn do we average in a harvest? Whether your students are just learning counting and basic addition, or learning multiplication and averages, a farm is a perfect place for them to experience math hands-on!

Students and teachers get the best of both worlds—a fieldtrip that is educational, yet FUN at the same time. Treat your students to a day outside of the classroom, where they can learn about a fundamental aspect of science—agriculture!

School Group Admission is \$6 for students, parents, and siblings. One teacher per 10 students is granted FREE admission!
